TRUE

PS100 LIGHT COMMERCIAL TREADMILL

SIMPLICITY + DURABILITY

The TRUE® PS100 treadmill is engineered for simple durability. Driven by a 3 hp DC self-cooling motor that delivers TRUE's signature smooth and quiet acceleration, the PS100 provides proven reliability, easy maintenance and an enjoyable workout experience.

CUSHIONED IMPACT

TRUE's patented Soft System® offers the most biomechanically correct running surface available. Neoprene shock absorbers in the front third of the deck cushion each foot strike while the back of the deck provides a firmer sensation, allowing for a stronger push off with each step.

USER FRIENDLY INTERACTION

The PS100 LCD screen and console includes four preset training programs and one-touch quick keys. The bright, legible display monitors every aspect of your workout, including Speed, Incline, Elapsed Time, Distance, Pace, Time Remaining, METs, and Calories.

TRUE HRC (HEART RATE CONTROL)®

The PS100 is equipped with a contact heart rate monitoring system as well as a wireless telemetry system, both of which assist users in maintaining their optimum heart rate and maximizing their workout results.

BUILT TO LAST

The PS100 is built on a welded steel frame that carries a lifetime warranty. The 3 hp motor, all other quality components and labor are covered for one year of use at non-fee based facilities where use is under 4 hours per day.
